

CRAFTED BY EARTH

VALLONE®

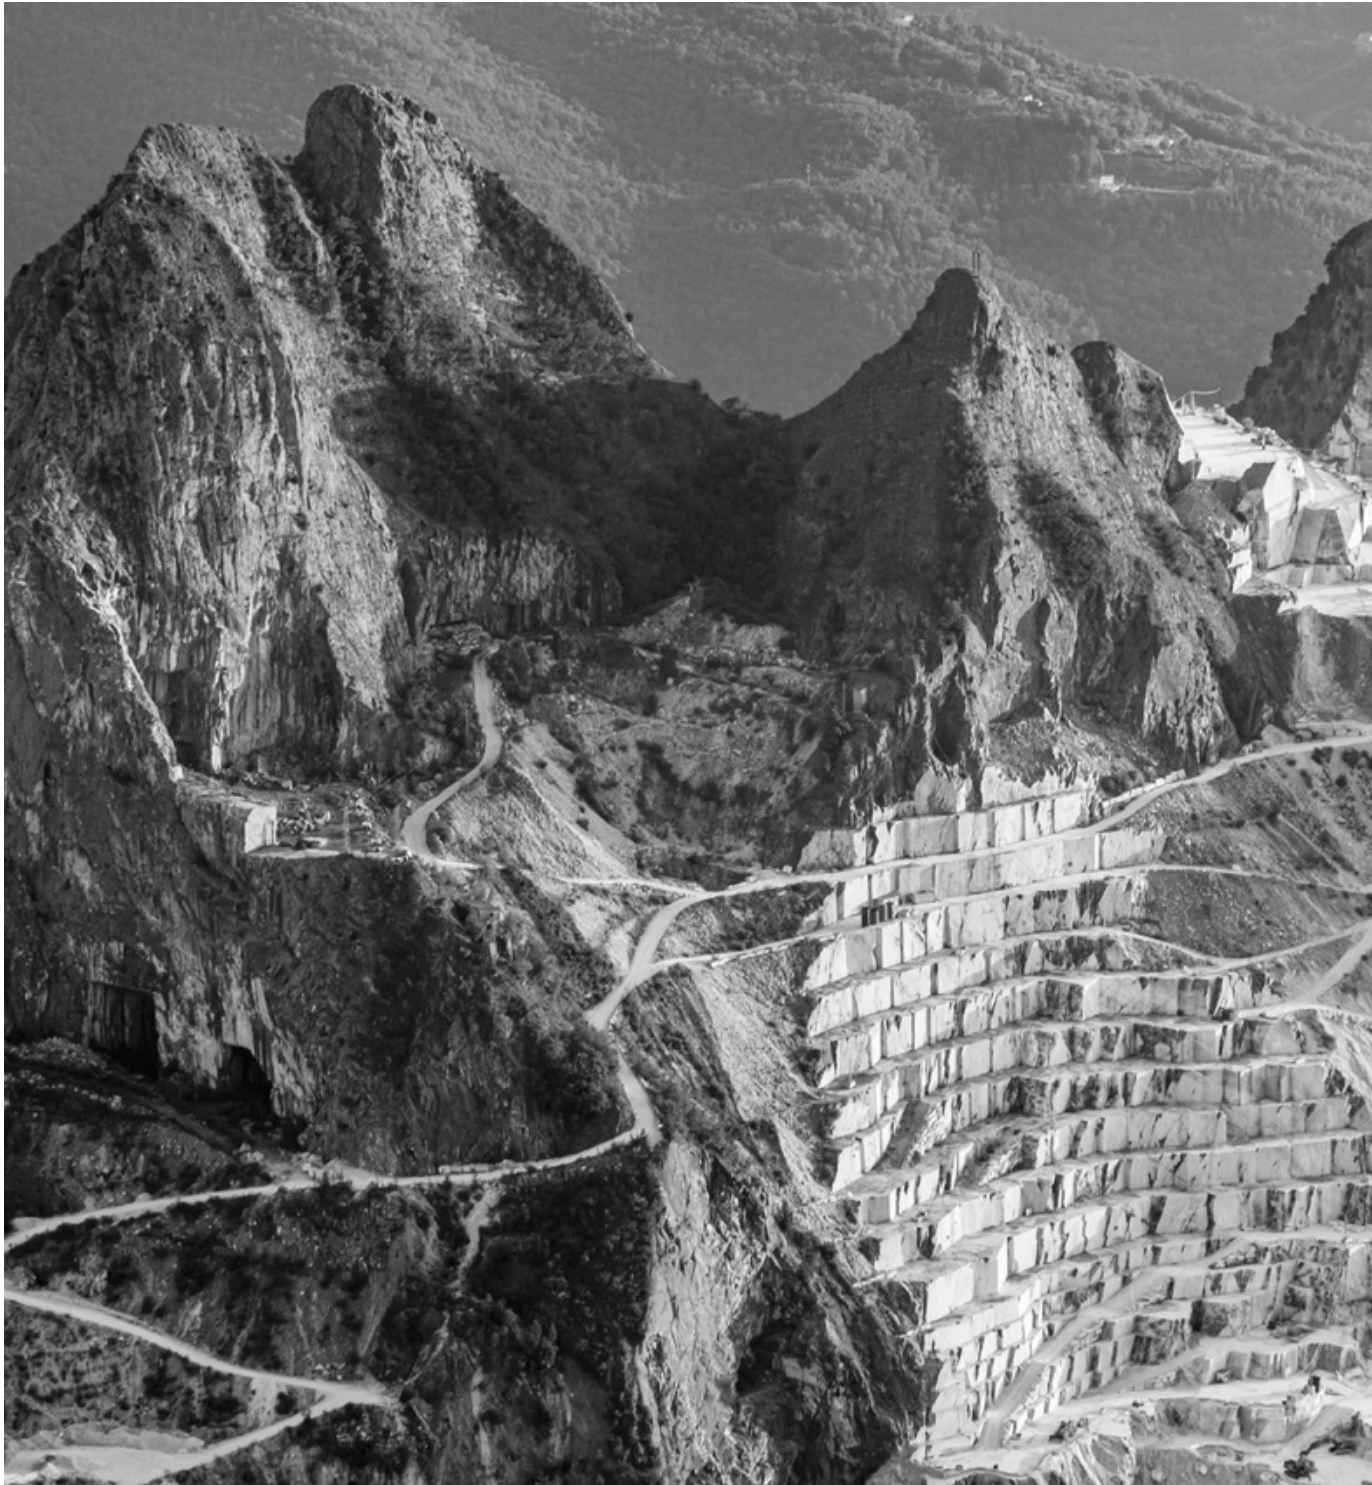

Unique pieces of marble – created in the origin by metamorphosis under the massive pressure of the mountains and under the influence of extreme temperature. Six rare and precious types of marble that we have translated into an iconic design collection. Six unique stones that come from the mountains around the Apuan Alps.

THAT'S APUA BY VALLONE.

POETRY OF ELEMENTS.

04

Almost 200 million years ago, the earth created itself anew. The continents slowly drifted apart, volcanoes changed the landscape and the climate unfolded a flourishing vegetation. A time of evolution. A time in which the element for APUA finds its origin: Marble.

100% natural stones, just as the earth created them. Refined by VALLONE® into exclusive design objects.

MASTERPIECE OF ETERNITY

08

APUA creates a distinctive accent in the bathroom. A unique piece with a unique visual structure created by nature over millions of years. Each material has an individual grain, no two objects are alike, each tells its own story: with unique patterns and colors that cannot be reproduced.

EVERY
PIECE
IS
UNIQUE.

100%
NATURAL.

APUA combines the expertise of stonemasons and engineers to create a safe design that translates skilled marble working, reliable fabrication and water-proofing into a fully finished design object.

Each centimeter of marble has a distinctive grain, a unique visual structure: veins that show the process of its natural formation. For APUA we have curated 6 different stones. Each of them special – made into your individual unique piece.

Our marbles are 100% natural. Stones, as the earth has created them, refined into exclusive design objects for individual bathroom concepts. Each individual stone passes through the experienced hands of our production in the process of selection and the final control.

14

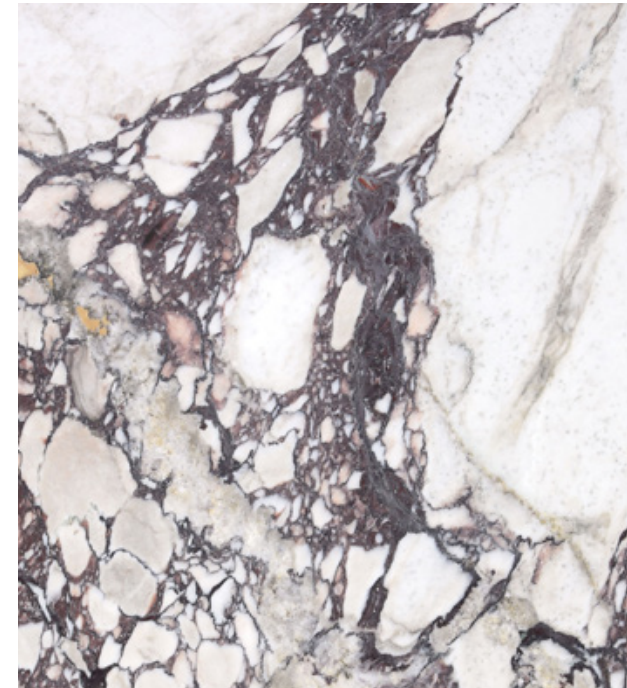

SO STRONG. SO SENSUAL.

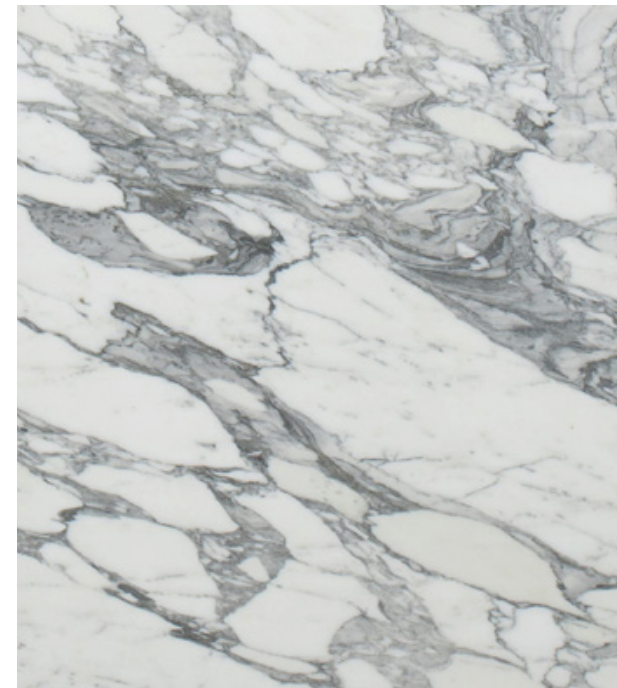

CALACATTA VIOLA

18

The Calacatta Viola is a true aristocrat among the types of marble. Precious, valuable and now very rare, it comes from the mountains near Carrara. Its idiosyncratic composition of white, gray and deep red and blue tones is finely and blue tones is finely orchestrated and conveys lively elegance.

ARABESCATO CORCHIA

Arabescato belongs to the famous Carrara marble family and is considered one of the noblest types of marble in the world. The Stone has been quarried for centuries in the mountains near Carrara in Tuscany and still conveys the stylish ambience of the Italian Renaissance.

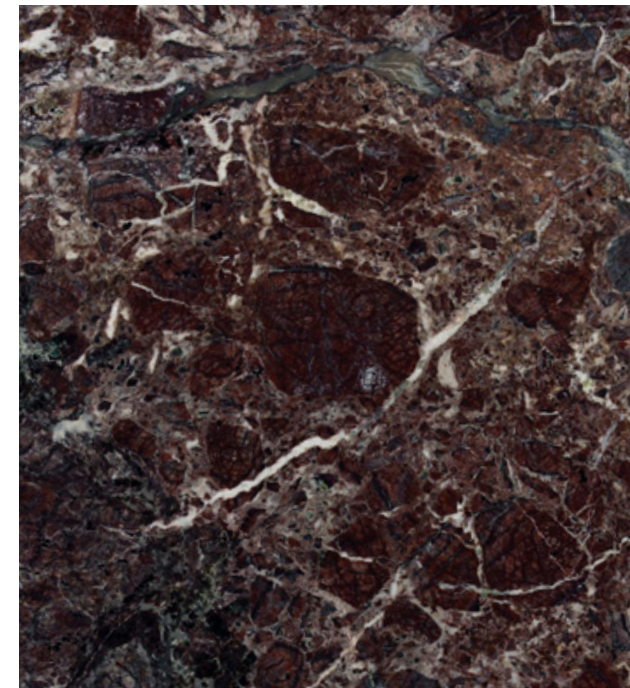

TRAVERTINO CLASSICO

Travertino Classico is marble turned into elegance: its almost linear marbling is classically fine. The interplay of subtle color nuances creates a harmoniously calm aura that lends timeless style to your bathroom.

ROSSO

LEVANTO

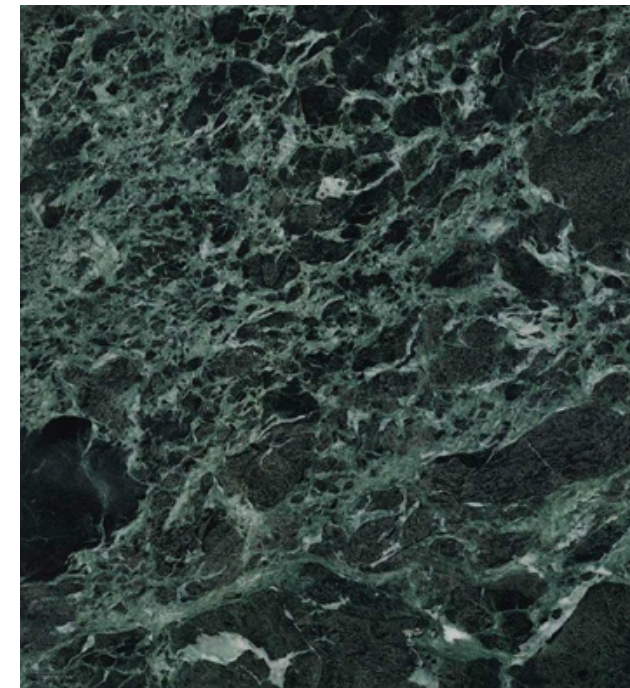

Rosso Levanto is a luxurious marble with a deep red base tone, interspersed with elegant white veins, some of which extend into green. Its strong red - almost wine red - gives this marble an unmistakable, lively look. The fine, sometimes chaotic veins create a dynamic contrast and emphasize the natural elegance of the stone.

VERDE

ALPI

26

The structure of Verdi Alpi resembles the landscape of the Alps and looks almost three-dimensional. Its petrol green accents possess depth and intensity: they convey the impression of powerful avant-garde luxury.

TUNDRA

GREY

28

Tundra Grey is characterized by a cool grey. Veins and shades of fine to broad white and light grey create a soft, cloud-like pattern in the stone. This structure gives the marble a subtle, timeless elegance that looks modern and natural.

WHITE

WOOD

White Wood is a light-colored marble with a unique, wood-like pattern. The soft white and grey tones and the long, linear veins give the stone a naturally warm elegance and a visually calming structure. Its subtle yet modern aesthetic makes White Wood ideal for minimalist room concepts.

SOFT TO TOUCH.

INTE- GRATED BLADE

RUNNING VEINS.

32

A unique material requires special attention to every detail. APUA is filigree and precisely processed and finally glued and finalized by hand. The subtly sanded surface creates the soft-matt look - the honed finish.

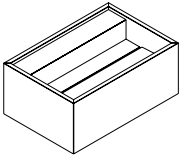

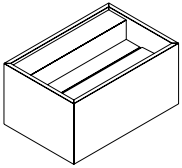

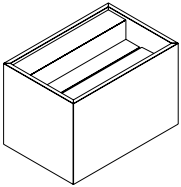

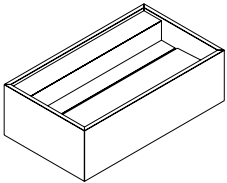

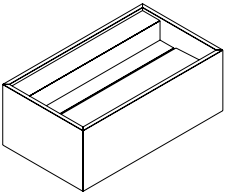

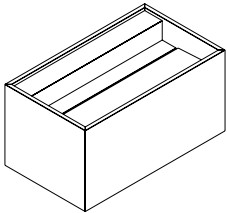

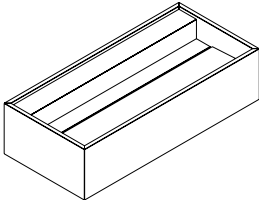

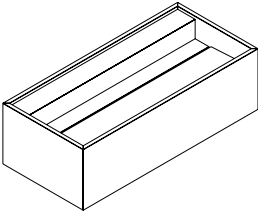

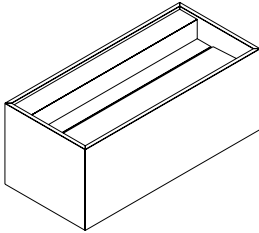

Clear shapes & straight contours: A special feature of APUA MONOLITH is the narrow removable drain plate, under which the water simply disappears.

Flowing transitions, harmoniously composed: Following the Running Veins principle, we create organic-looking stone compositions that do not seem to disturb the veins of the marbling. This creates the sculptural look of the object.

CREATE YOUR APUA MONOLITH

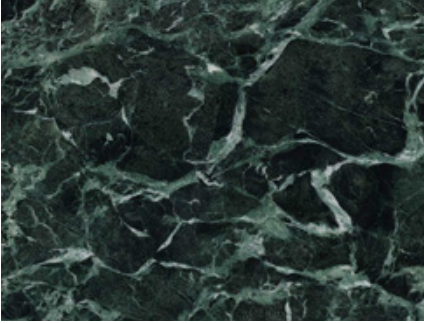

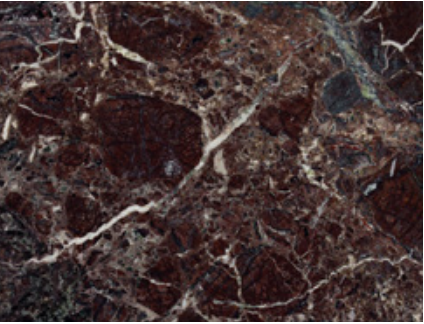

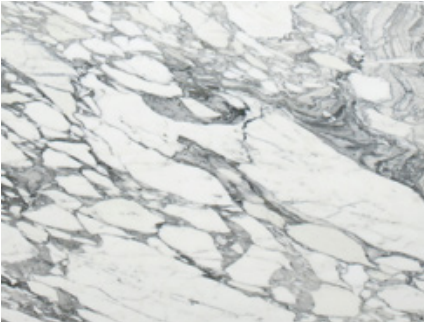

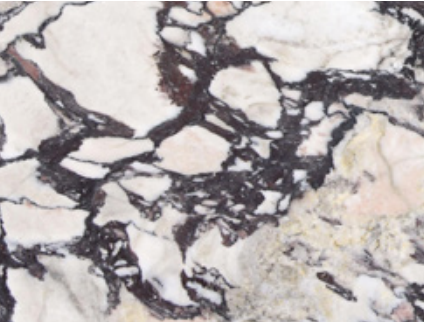

/ dimensions

60 x 40 cm	H 25 cm	H 30 cm	H 40 cm
			
80 x 46 cm	H 25 cm	H 30 cm	H 40 cm
			
100 x 46 cm	H 25 cm	H 30 cm	H 40 cm
			

/ features

- Always-Open drain set

- Transport safe packing in wooden box

/ finishes

		
travertino classico	verde alpi	tundra grey
		
rosso levanto	white wood	arabescato corchia
		
calacatta viola		

APUA is made of metamorphic, hand-worked natural stone. Illustrations and patterns are therefore only exemplary. APUA products may differ in terms of color and marbling gradients and fibers. Metamorphic Rock is crisscrossed by veins; finest hairline cracks, holes (pores) as well as scaly areas are typical characteristics.

APUA BOARDS, TOPS & BACKSPLASH

36

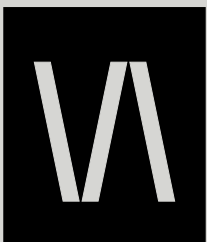

APUA is also available as a washbasin console, cover plate and backsplash for combination with VALLONE furniture, countertop basins and custom-made washbasins.
